

DMPTool Service Description

The Data Management Plan Tool (DMPTool) provides an easy to use interface that:

- Helps users create ready-to-use data management plans for specific funding agencies
- Meets funder requirements for data management plans
- Provides step-by-step instructions and guidance for how to manage data
- Provides information about resources and services available at your institution to help fulfill the data management requirements of your grant

DMPTool Service Manager

Perry Willett perry.willett@ucop.edu Trisha Cruse patricia.cruse@ucop.edu or uc3@ucop.edu. Note that campus library contacts have been embedded in the DMPTool and campus users will be directed to a local library contact.

Shibboleth Login

8 new universities configured their Shibboleth identity providers for the DMPTool in March, bringing the total to 46 universities using Shibboleth.

Recent Enhancements, News, and Activities

We added support for NSF Emerging Frontiers in Research and Innovation (EFRI). This program is a new funding opportunity for interdisciplinary teams of researchers in engineering. This solicitation, with a deadline of March 30, 2012, is the only one so far with this set of data management guidelines. We will track whether EFRI has subsequent solicitations with these (or other) requirements.

30 new users from UC campuses set up accounts in the DMPTool in March. There is a total of 380 UC users, and they created 37 data management plans in March. The greatest activity among UC campuses was at UCLA followed closely by UC San Diego. Overall, there were a total of 225 new users in February. All users created 201 data management plans.

The University of New Mexico and University of North Carolina-Chapel Hill have customized the DMPTool by adding local resources. There are now 9 institutions (outside of original partners) that have added resources.

The DMPTool Steering committee, with members at CDL, UCLA, UCSD, University of Virginia, University of Illinois, Smithsonian and DataONE, continues to work on ideas for governance, sustainability and new functionality. We plan on publishing a report in early summer addressing these issues.
