During the coming months, the staff and physical operation of USU Press will move to Merrill-Cazier Library, with the transition scheduled to be complete by July 1, 2010.

**LC launches Cataloger’s Desktop 3.0**

The Library of Congress (LC) recently launched Cataloger’s Desktop 3.0, a major modernization of its popular Web-based subscription service of important cataloging and metadata resources. Available from the LC Cataloging Distribution Service, Cataloger’s Desktop provides access to more than 280 electronic manuals, cataloging and classification standards, procedures, and resources. The new 3.0 version adds operational enhancements, greatly expanding its search and information-discovery features. Desktop 3.0 incorporates cutting-edge searching and navigation techniques, including fuzzy matching; finding/excluding similar resources; dynamic drill-downs; contextual analysis; search relevancy; remembering search histories; query federation; faceted search drill-downs; and a search engine that adapts to a user’s search behavior. Desktop is updated quarterly by LC’s Policy and Standards Division and is available to users 24/7 through the Cataloging Distribution Service. Subscribers to Desktop have automatically received the new version, and catalogers soon will have an opportunity to see Desktop 3.0 demonstrated at the Library of Congress exhibit booth at the ALA Midwinter Meeting in Boston in January 2010. For further information, visit www.loc.gov/cds/desktop.

**World War I postcards online**

Approximately 2,000 postcards from the First World War made their Internet debut on Veterans Day 2009 on the Web site of the University of North Carolina at Chapel Hill Library. The postcards, drawn from the Bowman Gray Collection of World Wars I and II in the Rare Book Collection of the Wilson Special Collections Library, are the first of nearly 6,400 that the library plans to digitize by June 2010. The Bowman Gray Collection features 16,000 graphic images from the wars including prints, postcards and posters.

World War I was the golden age of postcards, according to Libby Chenault, interim curator of the Rare Book Collection. Postcards were used to depict new military technology such as tanks and airplanes, to record scenes of mass devastation, and to distribute propaganda messages. The digitized postcard collection, when completed, will be the largest such presentation on the Web. Access to the collection is available at www.lib.unc.edu/dc/graypc/.

**Framing Instruction**

_Framing Instruction_, number 61 in the Publications in Librarianship (PIL) monographic series, is now available from ACRL. In _Framing Instruction_, John M. Budd of the University of Missouri-Columbia School of Information Science and Learning Technologies addresses the philosophical and practical implications of cognition and information and the practice of library instruction in the light of those implications. Budd presents a complete examination of the cognitive aspects of students’ perceptions and uses of information, including examples that can be adapted for courses or class sessions.

_Framing Instruction_ is available for purchase through the ALA Online Store (www.alastore.ala.org), by telephone order at (866) 746-7252 in the U.S. or (770) 442-8633 for international customers and will be available at the 2010 ALA Midwinter Meeting in Boston.

**EBSCOhost goes mobile**

EBSCO has released EBSCOhost Mobile, allowing researchers to access EBSCOhost databases via smartphones and other handheld devices. All databases and services currently available on the EBSCOhost platform will be available via EBSCOhost Mobile. The service provides a way for mobile devices users to find research content. The main screen of the mobile version offers a number of options including selecting a database to search plus setting search options, accessing field codes and specifying preferences. Many of the existing EBSCOhost features such as search modes, limiting to full text, date ranges, peer-reviewed content or by publication are available. Users will also be able to search images from their mobile devices.

More information is available at www.ebscohost.com.
