

5.1.1.4

5.1.1.4 - The repository shall have a process to record and react to the availability of new security updates based on a risk-benefit assessment.

With the CDL, UC3's parent organization, initial responsibility of the risk/benefit analysis of potential security updates is the responsibility of the Infrastructure and Application Support (IAS) services group, in consultation with the CDL Tech Council, made up of the technical leads from all CDL programs, including UC3.
