

Namaste

Namaste: Directory Description

Name:	Namaste
Version:	0.1 (2009-11-09)
Status:	Alpha
Specification:	Directory Description with Namaste Tags
Download:	CPAN v0.17 (2009-08-17)
More information:	Curation home page

Namaste (NAME AS TExt) is a file naming convention to support primitive directory-level metadata tags exposed directly via filenames. As such, Namaste tags greet visitors who request a directory listing (e.g., Linux 'ls') with a glimpse of what the directory holds.

Implementations

Namaste (Python)
